WWJZ

The station that remembers! *640 AM*

February 22, 1993

Mr. Bill Burrows
709 Division Street
Gloucester City, New Jersey 08030-2337

Dear Mr. Burrows:

This letter will confirm that your listening log of 11/18/92 agrees substantially with our test programming on or about that date.

WWJZ operates with 50,000 watts daytime, 1,000 watts sunset to sunrise, on 640 kHz, using plate-modulated GE and McMartin transmitters, with a four-tower directional antenna system.

Congratulations on your continued success in DXing the broadcast band, and thank you for including WWJZ in your listening schedule.

Sincerely yours,

Dan O'Neil
